Summary:

1. Invoices are not as per requirement, update the invoices
2. Search is not working in customer frontend, make it functional
3. Basic price filter is missing, implement the filter by price range option.
4. In notifications, both admin and customer-side that notifications must be included so they can be alerted when a new chat arrives.
5. On the website, when we create an ID, it is not visible in the customer list, even after changing the password to one with more than 6 characters, excluding special characters. Check this issue.
6. Also update the password instruction as " The password must be at least 8 characters long and contain at least one uppercase letter, one lowercase letter, one number, and one special character."
7. Update the Buy Now Button
8. Make Login as customer functional
9. Cancel and cut icon button not working.
10. Clicking on minus option when only one product is there, must be pop up are you sure to remove product, yes or no.
11. Add pop up like this then remove product accordingly.
12. For customer registration in the app, implement mobile verification pages. Currently, only email verification is available.
13. In the app, when creating a new account, an OTP is sent to the email. However, upon clicking "Resend OTP," we don't receive an OTP email. Instead, we receive an email with a "Click to Verify" link. When we click on this link, it displays a "Something went wrong" error. Resent Mail OTP is not working.
14. Fix these changes in mobile application.

- **Update the invoices**

Update all these invoices with correct values.
